

ADI/ APP rated Air Traffic Controller

The Role:

As an experienced Air Traffic Control Officer you will be required to provide the following:

- an Air Traffic Service as stated in CAP493: Sect1, Chap1
- the specific responsibilities stated in CAP493: Sect2, Chap1 of an Aerodrome Controller
- the service required of an Approach Controller, in CAP493: Sect3, Chap1

The Air Traffic Control Team:

You will be part of a small, experienced team who is currently responsible for providing an essential service to general aviation, business and military traffic at Brighton City Airport.

The Airport is one of the busiest in the UK with around 50,000 movements per year. The ATSU has also been modernised in recent years with the addition of a new touch-screen VCCS and other associated equipment. We are looking for a keen and talented individual to join our friendly team.

Responsibilities and Duties

- Comply with the procedures/instructions stated in MATS Pt2 and associated documents.
- Make meteorological observations (if qualified to do so), obtain frequent weather information and notify weather warnings to operators.
- Assist and participate in training and role development programmes of the unit.
- Arrive in the VCR in good time to facilitate a safe handover of the controlling position.
- Perform ATS Assistant duties when necessary.
- Perform secondary duties within the ATSU.

Individuals may also be required to carry out additional duties, as required by the business.

Qualifications and Skills

- Current ADI rating is essential
- APP (Procedural) rating is highly desirable
- Current Medical Certificate is essential
- A Meteorological Observers Certificate is desirable
- An OJTI rating is desirable
- English Level 5 as a minimum.

Competitive salary offered.

Job Type: Full-time

License or certification:

- Current EU Air Traffic Controller Licence (Required)
